

# GREG GOMES

Los Angeles, CA | (415) 509-5680

[ggomes@gmail.com](mailto:ggomes@gmail.com)

[PORTFOLIO](#)

[GITHUB](#)

[LINKEDIN](#)

**SUMMARY** Lawyer-turned-coder. Creative, analytical problem-solver. Fullstack web development bootcamp grad.

## EDUCATION

**App Academy** - *Web Development* | January 2022

**University of California, Hastings College of Law** - *Juris Doctor, cum laude* - Thurston Society (top 10% after 4 semesters)

**Pomona College** (ranked #4 liberal arts college in the nation) - *BA, Politics Philosophy Economics (PPE)*

## SKILLS

React, Redux, JavaScript, HTML, CSS, Python, Flask, SQLAlchemy, Express, PostgreSQL, Docker

## CODING PROJECTS (selected)

**BOOMBOX** (JavaScript, ReactJS, Redux, Python, Flask, SQLAlchemy, AWS S3, Docker)

[live](#) | [github](#)

*A fullstack single-page Spotify clone where users can stream music, create playlists, and follow other users and playlists.*

- Utilized **Flask** and **SqlAlchemy** API to seamlessly store and serve data from the database to the front end.
- Integrated **Redux** with **HTML5** audio player to create customized audio playback for user.
- Implemented song queue slice-of-state with **Redux**, enabling sharing of information across React components.
- Created live search function employing eager loading for robust, dynamic search UX without sacrificing speed.

**INSTAGRAMME** (JavaScript, ReactJS, Redux, Python, Flask, SQLAlchemy, AWS S3, Docker)

[live](#) | [github](#)

*A group-developed fullstack Instagram clone where users can share posts with followers and follow other users.*

- Utilized **Flask-SQLAlchemy** to create self-referential many-to-many relationship in database, eliminating need for multiple separate “follows” models, significantly reducing server load and simplifying backend queries.
- Created modular **React** component allowing user to view individual posts and associated likes and comments from multiple pages while eliminating need for duplicative code.
- Connected **Python** back end to **AWS S3** for media storage and organization while maintaining content security.

## EXPERIENCE

### Coding Bootcamp

*App Academy*

July 2021 - Jan 2022

- Rigorous 6-month program in fullstack software development with <3% acceptance rate.
- One of only 15 students to pass all weekly assessments, out of original cohort of 90+.
- Developed four full-stack web applications; extensive pairboarding experience.
- Topics include: Javascript, Python, SQL, React, Redux, design patterns, TDD (test-driven development), systems design, RESTful API conventions, security, single-page apps, and web development best practices.

### Supervising Attorney

*The Justice & Diversity Center of the Bar Association of San Francisco*

Feb 2020 - Jun 2021

- Supervised team of three legal advocates; advised and mentored junior attorneys.
- Represented 60 tenants per year in legal proceedings; successfully negotiated dozens of case settlements securing housing and monetary benefits for clients worth hundreds of thousands of dollars.

### Staff Attorney

*Bay Area Legal Aid*

Mar 2015 - May 2018

- Represented over 200 individuals and families in housing matters in state trial and appellate courts.

### Staff Attorney

*Ninth Circuit Court of Appeals*

Jan 2014 - Feb 2015

- Reviewed lower court records, parties’ briefs and other documents filed on appeal in federal criminal cases; conducted in-depth legal research; drafted legal memoranda analyzing relevant issues; prepared draft decisions.

### Associate Attorney, Complex Commercial Litigation

*BraunHagey & Borden LLP | Chapman, Popik & White LLP*

Jun 2011 - Dec 2013

- Drafted motions, court filings, discovery requests and responses, and meet-and-confer correspondence in wide variety of complex corporate litigation matters, including in the areas of class actions and breach of contract.

## FOR KICKS

Hiking, reading, photography, old-school hip-hop and indie.
